

Transparency International Belgium (TIB)'s Conference

**Using Technology and AI to enhance ethics,
compliance and ESG reporting efficiency**

**NOV
28**

Time: 9:30
- 14:00 CET

This event organised by Transparency International Belgium will bring together solutions providers, business leaders, legal experts, and professionals from various sectors to explore how emerging technologies and AI can enhance ethics, compliance and ESG reporting.

SUMMARY

In today's increasingly dense and complex legal and regulatory environment, businesses and organisations are under increasing pressure to ensure compliance with ever-evolving laws and regulations and associated sanctions. Emerging technologies and AI offer innovative solutions to assess, develop, automate, streamline, monitor, report and enhance compliance processes – reducing risk while improving efficiency.

This conference will offer a series of practical discussions and expert insights on how AI, data management, process automation, and blockchain are revolutionizing ethics, compliance, and risk management.

Participants can expect:

- **Innovative Solutions:** Explore cutting-edge tools in AI and technology for ethics and compliance.
- **Real - World Applications:** Learn from case studies, and best practices on AI integration.
- **Expert Insights:** Engage with thought leaders from law, technology, and industry practice

**Location: University Foundation,
rue d'Egmontstraat 11, 1000
Brussels.**
